

Locate and Process Serving

Verity's Locate and Process Serving services aim to provide a high standard of legal support to accurately locate defendants and witnesses, and to ensure secure delivery of legal documents and notifications.

Our Quality Service

Locate Defendants

When a defendant is identified, the next step is to locate. However, limited information may be found and in some cases, defendants may have moved or even try to avoid the case. With our experience and extensive network, we ensure defendants are correctly located in a timely manner.

Locate Witnesses

It is critical to have the right witnesses to build a strong case. Unfortunately, locating witnesses can be a rather challenging process. For this reason, we utilize our intelligence expertise to access in-depth information to successfully locate, find, and determine the correct witnesses. In addition, we also provide service in locating the most qualified expert witnesses to help understand a case in order to reach a sound decision.

Process Serving

We possess extensive experience in process serving and are familiar with the legislation, which enables safe and efficient delivery of legal documents and timely enforcement of judgment at all times.

Our Professional Approach

Investigate by Trustworthy Staff

While other third party services use messengers to deliver documents or outsource investigative actions, we strongly believe to conduct all actions by our experienced full time staff. This will ensure the trustworthiness and reliability of all obtained evidence, and secure delivery of all documents.

Comprehensive Research

Detailed research is performed on the individual to learn his/her background information, contact details and addresses to facilitate further investigation. Internet and media search is also conducted to ascertain the individual's personal and lifestyle information.

Physical Visits

Conduct visits to study the environment and interact with people in the area to learn his/her whereabouts.

Surveillance

Carry out surveillance to closely observe the individual's facts and daily activities.
